

TSRA Does Amazing Job with New Canoe Access at Williamson County Rec. Center

**Volunteers needed for new structure at Pinkerton Park
beginning in February.**

Harpeth River Watershed Association would like to congratulate the Tennessee Scenic Rivers Association (www.paddletsr.org) on the fabulous structure they completed at the Rec Center funded by REI Outfitters. HRWA is very grateful for the work of TSRA and encourages our members to lend a big hand in the construction of the next structure at Pinkerton Park. This structure is a huge improvement over the previous access and will be enjoyed by all paddlers.

New structure for canoe access at the Rec Center just prior to final trim.

The City Parks has expressed interest in making a larger structure incorporating a viewing platform/overlook. We believe the collaboration between TSRA, the City Parks Department with support from HRWA will create an amenity that everyone can be proud of. This project is one facet of a Blueway Plan for creating a great recreational experience all along the Harpeth River and is a collaboration between TSRA, HRWA and various local agencies such as parks departments, fire and rescue and others. If you are interested in helping with other projects like this, contact HRWA at 790-9767 ext. 108 or email sarahgann@harpethriver.org.
