Discussion following the film

A Crude Awakening tells the story of how our civilization's addiction to oil puts it on a collision course with geology. Compelling, intelligent, and highly entertaining, the film visits with the world's top experts and comes to a startling, but logical conclusion: our industrial society, built on cheap and readily available oil, must be completely re-imagined and overhauled. The film spells out in detail the challenge we all face, and underscores our desperate need for alternative energy. (Running time: 90 minutes)

The end of cheap oil is upon us...
