

Wines by the Bottle Menu: To assist you in choosing a wine for your dining experience, we offer the following simple guide. Each wine is described according to its body, flavor, acidity or tannin and finish. All wine and liquor prices include a 15% alcohol tax.

BODY-The skeleton of a wine: *Light, Medium, or Full* depending on the grape variety, the winemaker's style and growing conditions. **FLAVOR**-Wines often suggest a flavor. Families of flavors are: *Fruity, Earthy, Spicy and Herbal*; further described as *Apple, Pear, Mint, etc.* **ACIDITY**-The nervous system of each wine; mainly a white wine factor; taste on the sides of the tongue. Acidity gives wine life, "zing" and finish; balances sweetness: Acidity makes a wine *Crisp*, Lack of makes a wine *Flabby, Soft.* **TANNIN**-A factor in Red wine; taste at the back and sides of the tongue. A drying-out sensation occurs when tannin is high; from grape stems, seeds and skins. Low tannin, caused by oak aging, makes for a softer wine: *Bitter, Firm, Soft.* Tannin contributes to body, balance and ageability. **FINISH** - describes intensity of flavor, depth and length on the palate.
